

# OTT Industries

## Enhancing safety through innovation

- Portable, on-site, off-grid, warehousing
- Durable, long-life, delineator and signage solutions

# Mine road hazards

**Poor visibility and fatigue-**  
increased chance of accidents  
involving vehicles and workers

**Heavy machinery traffic-**  
requires careful management to  
prevent collisions

**Environmental hazards-**  
wind increases risk due to sign  
movement which can lead to  
driver confusion or errors

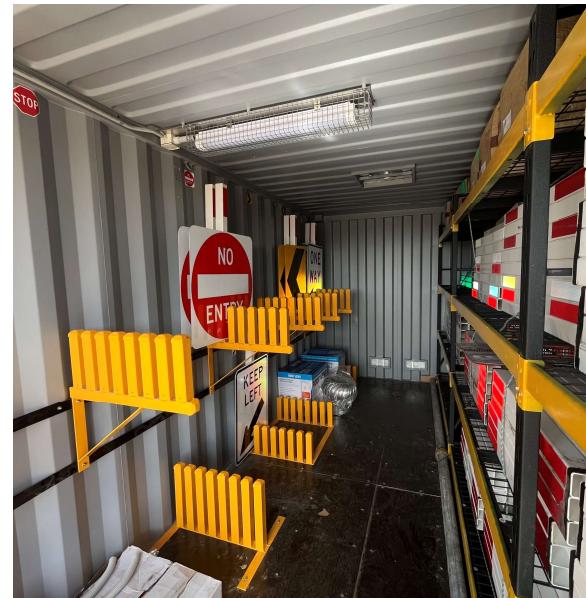

# OTT Industries

- **provides customised, robust safety solutions**
- **help prevent accidents**
- **protect workers from hazardous mining operations**

# OTT Industries

- **provides customised, portable, on-site, secure warehousing solutions**
- **providing access and egress for safe manual handling of products**
- **dry storage in off-grid, well-lit and well-ventilated containers**

# Key benefits

- **collision hazard mitigation**
- **OTT products provide timely alerts to reduce collision risks, improving safety for workers**
- **enhanced visibility alerts improve awareness during poor visibility conditions, helping prevent accidents effectively**
- **long-life signage and delineators (7-year warranty)**

## Key benefits

- **rapid installation with readily available tools**
- **unique square section design prevents twisting from wind**
- **solar powered flashing beacons for intersection delineators**
- **sustainable materials**

# Real Mine Deployment

- the products have been deployed Goonyella Riverside BMA
- demonstrates practical application and reliability
- seamless integration of the product with existing mining infrastructure ensures smooth operations
- product performance highlights operational efficiency and effectiveness in challenging conditions

# OTT Industries

**Enhancing safety through innovation**

- **portable on-site warehousing**
- **delineator and signage solutions**
